

Welcome!

Military Road Capacity & Safety Project

Public Meeting - April 25, 2024

Welcome to the public meeting for the Military Road Improvement Project!

Please review the exhibit boards around the room with project information. There are staff members available to answer any questions you may have about the project. The meeting room will be open from 5 p.m. - 7 p.m., and there will be a brief presentation at 6 p.m.

We are excited to begin the journey of enhancing and widening Military Road between Lemmon Drive and Lear Boulevard in Reno. This project is not just about expanding a roadway; it's about investing in the safety, accessibility, and overall well-being of our community.

With an investment of approximately \$25.5 million, funded with Regional Road Impact Fees, this project aims to bring significant improvements to our community. From increased roadway capacity to enriched multimodal transportation options for pedestrians, bicyclists, and scooter riders, we are committed to creating a safer and more efficient transportation network in the North Valleys. Together, we will enhance traffic flow, improve safety at intersections, and upgrade drainage systems to create more resilient infrastructure.

We appreciate the community joining us to learn more about this project. We look forward to providing you with more information and answering any questions you may have.

All meeting materials are also available online at NorthValleysImprovements.com.

Frequently Asked Questions

How will the new roadway look when it's complete?

The figure above shows a cross-section of the proposed roadway design on Military Road between Lemmon Drive and Lear Boulevard. The road will feature two lanes in each direction, a center turn lane, and a multi-use pathway for pedestrians and bicyclists. There will also be improved drainage and added landscaping. The proposed design also allows for pedestrians to continue using the existing sidewalks on the non-shared-use path side of the roadway.

What benefits will the new roadway provide?

The project offers a plethora of benefits to our community, including enhanced traffic flow and safety, increased roadway capacity, a new multi-use path for pedestrians and bicyclists, improved safety measures at intersections, improved drainage systems, and accessibility enhancements.

When will the project start?

Construction on the project is anticipated to begin in 2025.

How much will it cost?

This project represents a significant investment of approximately \$25.5 million into our community funded with Regional Road Impact Fees, which are fees paid by developers.
